

Slab Building Templates

SAH Studio — pick a design, cut it out, cut your clay

How to use these templates

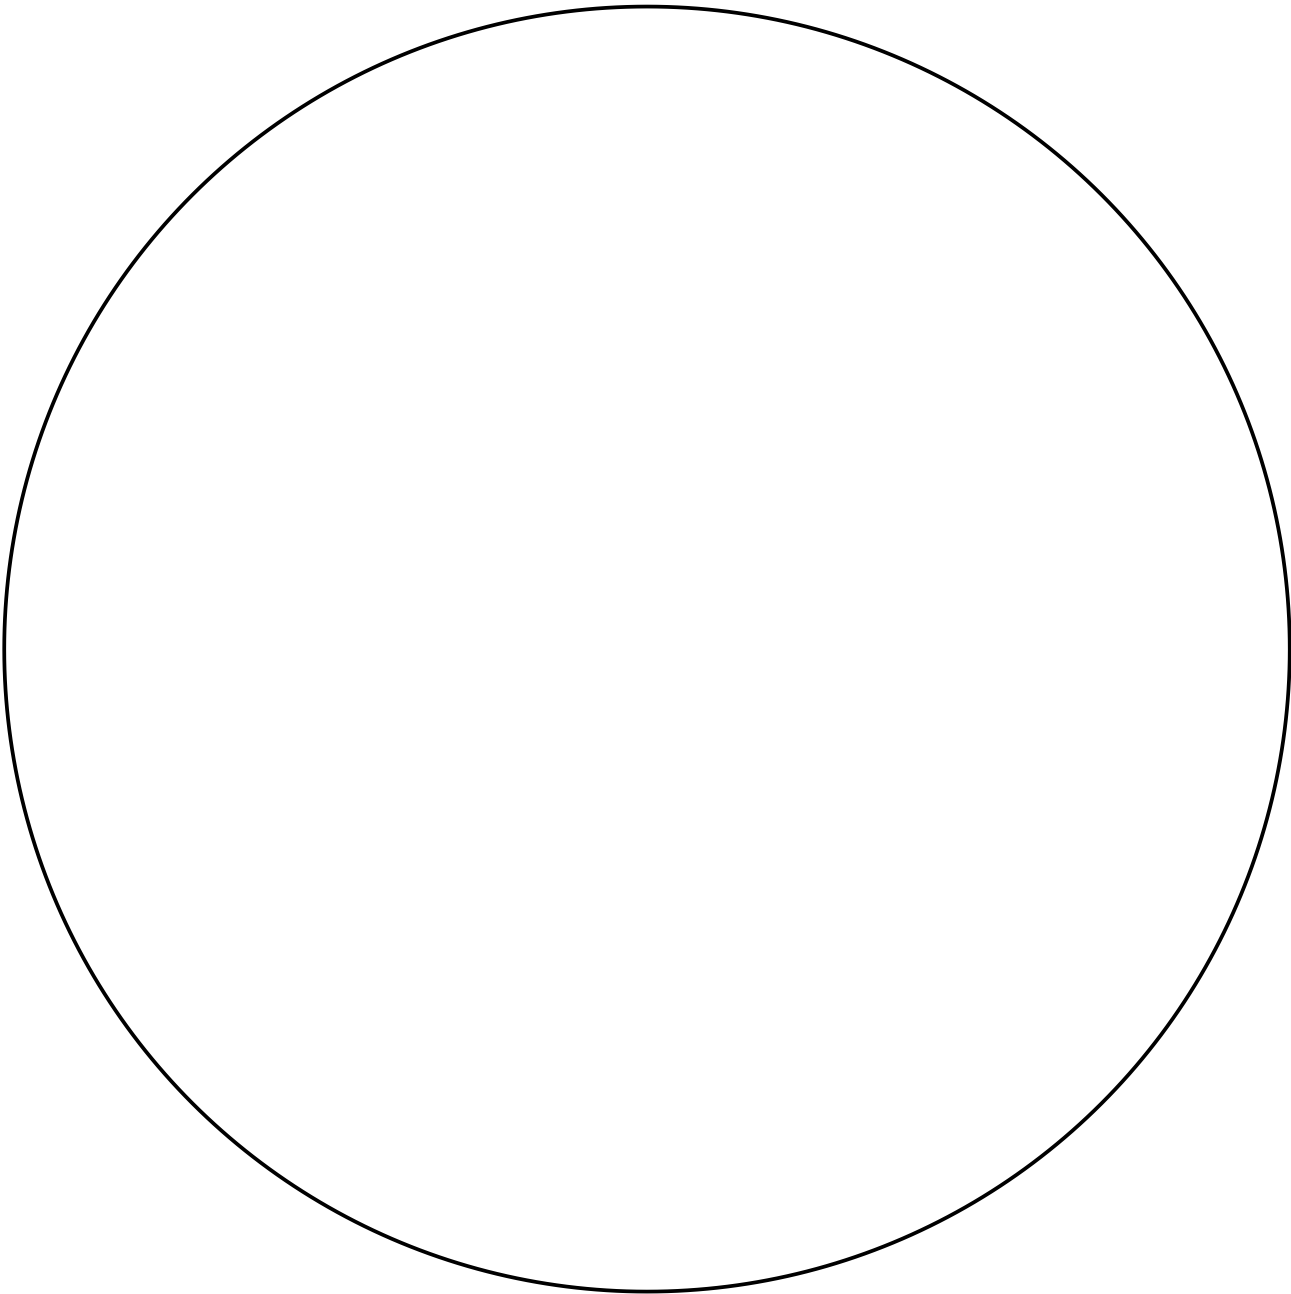

1. Print this PDF at 100% / Actual Size — turn OFF "Fit to page" or "Shrink to fit".
Works on both A4 and Letter paper, no need to pick one.
2. Check the 5 cm scale bar at the bottom of any template page to confirm it printed true to size.
3. Cut each paper template out along its black outline with scissors.
4. Roll your clay slab to an even thickness (about 6–10 mm / ¼– in).
5. Lay the paper template on the slab and cut around it with a needle tool or clay knife.
6. Peel away the scrap clay, smooth the cut edge with a damp sponge, and you're ready to build.
